Editorial

Alice wrote a sequence of words in **CamelCase** as a string of letters, *s*, having the following properties:

- It is a concatenation of one or more *words* consisting of English letters.
- All letters in the first word are *lowercase*.
- For each of the subsequent words, the first letter is *uppercase* and rest of the letters are *lowercase*.

Given *s*, print the number of words in *s* on a new line.

Input Format

A single line containing string *s*.

Constraints

- $1 \leq |s| \leq 10^5$

Output Format

Print the number of words in string *s*.

Sample Input

```
saveChangesInTheEditor
```

Sample Output

```
5
```

Explanation

String *s* contains five words:

- save
- Changes
- In
- The
- Editor

Thus, we print **5** on a new line.
